Aura Harmonizing Energy (Balancing Colour)

Orange

Energy quality: Orange is a mixture of the warm colors red and yellow. Orange approaches healing, natural sunlight in its effects. With the strongly vitalizing red and the metabolism-activating yellow it has a dampening effect and therefore acts softly yet penetratingly.

Spiritual effect: The color orange is a positive energy in every respect; it brings joy and life force to the organs and the disposition. For this reason, orange has a strong health-promoting effect. It acts softly, unobtrusively, has an invigorating, driving, uplifting, strengthening, cheering and motivating effect.

Physical effect: Orange stimulates tissue formation, relieves cramps, acts slightly sympathicotropic, strengthens, activates the metabolism and relieves blockages.

Treatment:

- **Treatment process:** Massage the color energy clockwise into the tissue, applying a soft, stimulating pressure. Be sure not to over-stimulate or irritate the skin or reflex zone.
- **Treatment frequency:** 1 to 3 times daily
- **Treatment time:** approximately 4 minutes. However, if you react strongly to the color stimulation, experience symptoms and feel unwell, immediately terminate the treatment. In this case, it is better to apply the color regulation more often and for a shorter duration (approximately 2 minutes) per session.

Aura Stabilizing Colour Energy

Green

Pancreas

Hand Zones

Treatment of the pancreas in general:

Due to the enormous pollution by electrosmog, consumption of low-quality carbohydrates, the modern fast-paced lifestyle and general stress, the sensitive hormone system is easily imbalanced. Diseases of the pancreas in particular, such as diabetes, have increased significantly. With most clients, the biopulsar measurement indicates a higher energy graph in the pancreas. The pancreas is overtaxed and radiates in the aura colors blue, magenta, white so that treatment with an infra-green color is required. The color yellow is a general tonic for the pancreas and activates the entire digestive tract. It promotes the production of digestive juices such as bile, hydrochloric acids, etc. and stimulates the digestion and the lymphatic system.

Pancreas

Organ Description

The pancreas lies diagonally in the middle of the stomach.

- The head of the pancreas borders on the duodenum, **the tail on the spleen.**
- It is located behind the stomach and in front of the spinal column.
- The pancreas has an
- **endocrinal part (with islets of Langerhans) for hormone production (insulin and glucagon production) and an**
- exocrinal part which produces around 1.5 litres of digestive juices a day.

This exocrinal part contains:

- ▶ **amylase (for the digestion of carbohydrates).**
- ▶ **lipase (for the digestion of fat)**
- ▶ **trypsinogen, chymotrypsinogen: necessary for digesting proteins**
- ▶ **bicarbonate (neutralises hydrochloric acid)**
- The pancreas opens into the duodenum at the papilla Vateri.
- The pancreas lies in a retroperitoneal position (half covered with abdominal membrane).

Pancreas

Affirmation

General

- "I am full of confidence and self-confidence."
- "I believe and trust in my future."

Dr. R. Dahlke

- "I am open for self-development and love for myself."
- "I am independent of the esteem of others."

Louise Hay

- "I love and accept myself, I am loving and lovable. "

Pancreas

Organ Language

Field Research with the Biopulsar-Reflexograph®:

It is noticeable that with most people who are measured with the Biopulsar-Reflexograph® (for about the last 5 years), the bio-feedback graphs of the pancreas reflex zone show too high values (above the green harmony line). The following reasons could be considered for the energetic overcontrol and exhaustion of the pancreas:

- Time problems: a lack of time for the sweet things in life - love - and "sweet" relationships (partnership, friendship). Time goes by too fast.
- Result: increased stress at work (there is insufficient time to get through the workload in good time).
- Fast living: time becomes faster both subjectively (even children are complaining) and objectively (atomic clocks have to be readjusted). Consequence: ageing speeded up.
- Entry into a New Age
- Our solar system is entering the vibration region of a superordinate solar system. We are entering a New Age (= Golden Age - ref. Brahman astrology. The astronomic entrance takes place when the earth is at 21 degrees mula (=root) segment in Sagittarius. This happens every 12,914.7 years and is about to happen. The solar plexus chakra (personal solar centre that stands in resonance with higher solar systems) is particularly affected by this. It is already absorbing the increased manasic vibrations of our cosmic Central Sun which is located in the Pleiades.
- Endocrine lapses caused by rapidly increasing electro-smog exposure through radar (increase in no-frills airlines), mobile radio towers, UMTS, mobile telephones, cordless DECT telephones, computer with radio functions such as wireless LAN, bluetooth, PDAs, etc.
- Changed nutritional behaviour: over-consumption of unnatural carbohydrates.
- Carbohydrate-intolerance can lead to diabetes in the case of certain metabolic and blood group profiles.

Traditional Chinese Medicine

- Sugar is often equated with love (= the sweetness in life).
- Negative emotions
 - ▶ Guilt - the pancreas is a shock organ
 - ▶ Craving for recognition
- Positive emotions
 - ▶ loving oneself,
 - ▶ appreciation,
 - ▶ to be independent of the esteem of others.
